What YAKI-IMO is ?

- **Roasted sweet potato**, also known as **YAKI-IMO** in Japanese, is a popular autumn and winter snack food in Japan.

The texture and taste of sweet potatoes vary around the world and Japan has probably one of the widest selections out there.

YAKI-IMO help keep people warm and feeling full in more ways than one. there is the actual heat of the roasted potato itself and its deliciously sweet flavor.

In recent time,

a lot of news buzz in our ears that concerned people are looking for healthy food recipes.

YAKI-IMO could be one of your best substitutes of eating greasy foods that you have been eating since a long time ago.

It is great to be a **vegetarian** for some reason,

Change your food menu and start eating **healthy Japanese natural foods**.

What YAKI-IMO is ?

Japanese sweet potato is rich in dietary fiber, vitamins, and minerals.

○ **【Calories and The 3 Major Nutrients】 *per 100g**

Calories : 163 kcal

Protein : 1.4 g

Lipid : 0.2 g

Carbohydrate : 39 g

【Vitamins】

Vitamin B1, B2, B6, Vitamin C, Vitamin E, Niacin, Pantothenic acid, Folic acid

【Minerals】

Potassium, Calcium, Magnesium, Phosphorus, Iron, Copper, Manganese

【Others】

Dietary fiber

Sweet potato skin contains antioxidants such as 「anthocyanin」 and 「chlorogenic acid」 .

Furthermore, there is a nutrient called 「jalapin」 which only sweet potato contains.

It is said that the very rich in nutrients **YAKI-IMO** has effects on the prevention of cancer, antioxidant effect, beautiful skin, diet, high blood pressure, the prevention of swelling, and lifestyle diseases prevention.

Eating sweet potato with skin can enhance the effects on beautiful skin, antioxidant effect, and constipation relief.

What YAKI-IMO is ?

The greatest feature of Japanese **YAKI-IMO** is that rich sweetness and the moist texture.

- The sugar content of a raw sweet potato is about 10°Bx, but after roasting in a special oven the sugar content will increase to over 40°Bx and the sweet essence will overflow from the surface of the sweet potato. And, the sweet potato contains adequate moisture which leads to a very creamy texture.

Although the **YAKI-IMO** contains rich sugar content and is high in calories, it is still suitable for diet products.

Here are the reasons:

- **Low GI value due to the cooling process**
- **Suppress the blood sugar level by the resistant starch**
- **Slow the carbohydrate absorption by the dietary fiber**
- **Suppress the carbohydrate absorption and burn the fat by chlorogenic acid**
- **Persist the feeling of fullness by potato protein which can be the prevention of overeating**

YAKI-IMO is a very healthy food due to it is such a product

which just roast the natural sweet potato

without any food additives or seasonings that may be harmful to human body!!!

Q&A

About Sweet Potato(Fresh)

Q : Is the purchase route clear? Could the production areas and the varieties be guaranteed?

A : As we purchase the sweet potatoes only from Japan Agricultural Cooperatives and contracted farmers, the varieties, the production areas and the harvest period etc. are guaranteed.

Q : Is the trace-standard of agricultural chemical satisfied? Do you have organic product?

A : What we purchase will satisfy Japanese standard.

As sweet potato is cultivated in the ground, the amount of agricultural chemicals adhered is extremely less than fruits and other vegetables.

It is also available to purchase the organic sweet potato for us. Please feel free to contact us.

Q : Is the supply stable throughout a year?

A : The distribution season of the market is limited. From October every year to around April the next year is in season and from May to September the distribution amount will decrease a lot. If you want to secure the stock during the off-season, it is necessary to make a business contract.

Q : How long the freshness can be kept?

A : We transport the product with a reefer container by air and also use the freshness retaining agent to suppress the degradation during transportation.

After arriving at the destination, the freshness still can be kept in a certain degree for several weeks under a proper temperature control.

If a long-term freshness keeping is necessary, we recommend our Roasted Sweet Potato (Frozen).

Q&A

About Roasted Sweet Potato(Frozen)

Q : Do the manufacturing factory has acquired certifications such as HACCP?

A : Conforming to Japanese Food Sanitation Act.
Preparing for acquiring HACCP.

Q : Is it possible to specify the package design or the amount?

A : Yes. After hearing the request, we will offer a cost included proposal.

Q : Is the supply stable throughout a year?

A : Manufactured roasted sweet potatoes are stored in factory's freezer so it is more stable in supply than raw sweet potato comparatively.

Q : How long is the expiry date?

A : About 1 year as frozen. 1 day if heated as a hot snack. 1~2 days if refrigerated as a cold snack.

Q&A

About Sweet Potato Roasting Machine

Q : Certifications of cooking appliance?

A : CE marking acquired.

Q : Any sales result?

A : About 10 years business results until today.

About 10,000 units sales results toward Taiwan, Japan, Korea, Thailand and Vietnam, mainly in Asia.

Q : Support various countries voltage?

A : Support 100~240. Various countries plug type can be chosen.

Q : What about the repair service?

A : We do not have visit service but we provide repair parts. Special tools are unnecessary.

Very simple electric design, easy to do the part replacement.

Q : How to get a rental sweet potato roasting machine?

A : Only the customers who order our Sweet Potato(Fresh) or Roasted Sweet Potato(Frozen) regularly can have the rental service.

It is forbidden to sell other company's sweet potato related products with our machine.
